Subject: 42V Battery SOH/SOC Interface Workgroup - Teleconference
Information

In response to a request from a few members of the "42V Battery SOH/SOC Interface" workgroup who are not able to be present for the kickoff meeting this week in Dearborn, we have arranged for a teleconference connection. Here is the dial-in information for anyone wishing to join the meeting on Thursday, January 18th, from 1:00 p.m. until 5:00 p.m. United States Eastern Standard Time:

Dial In Number: (865) 544-0905
Participant Code: 147339

If anyone is having trouble accessing the voice line, you can call Karl Keckan at Ford (313-594-1097) or leave a message on his pager (313-851-0392).

In the future, we may decide to use NetMeeting to share documents in real time during teleconference meetings. In addition, we will also ask participants to post documents and presentations that will be made at each meeting in the "Battery SOC/SOC Workgroup/Meeting Dates" section of the following web site:

<http://auto.mit.edu/vei/reg.nsf>

In order to access this site, please use the following password information:

Username: ford
Password: Formula1

We're looking forward to seeing everyone at the meeting on Thursday.

Regards,
Gary
