From: Gary DesGroseilliers <gjd@MIT.EDU>
Subject: MIT Consortium - BCM Workgroup Teleconference -

The next teleconference of the Battery Condition Monitoring Workgroup will be held on Tuesday, June 5, 2001, from 6:00 p.m. until 7:00 p.m. (United States Daylight Savings Time). The meeting was scheduled to begin at this time so that it would be convenient for Asian participants. As we discussed in Lisbon, we will rotate the timing of the meeting so the burden of an inconvenient time is equally shared among the participants in North America, Europe and Asia.

The agenda for the meeting on June 5th will include a report from Tom Dougherty concerning his discussion with Bolder, Delphi and TRW on the battery discharge performance parameters. If anyone would like to add another topic to the meeting, please contact me.

The login info for the NetMeeting is as follows:

Meeting Date: Tuesday, June 5, 2001
Meeting Time: 6pm ---- 7pm (US Eastern Time)
The lines have been reserved from 5:45pm for connections.

Telephone Connection:

Dial-in Number for the United States Participants: (800) 447-7138
Dial-in Number for International Participants: (630) 424-2077
Passcode: 6027328 (you might need to enter the # symbol after the number)

NetMeeting Connection:

- 1) Launch NetMeeting
- 2) Click "Call" and select "New Call..."
- 3) Fill in "To:" item with: www.public-data.ford.com, then click "Call" button
- 4) If presented with a list of conferences, select "BatteryCMJune5"
- 5) When prompted for a password, enter "condition"

I understand that some European participants had trouble connected during the meeting on May 2nd. For example, Hans-Peter Schoener could only join the teleconference from his cellular-phone. The telephone line at his office has a different signal technology from the dial-in line of the teleconference. I'm not sure what we can do about this, but Henry Huang has suggested that you speak with your local telephone company. If there are any other connection problems, please call Henry at (313) 845-3768.
